

TIMBER TRANSACTION PRICE SERVICE

1) How to Use RISI's Timber Transaction Price Service

RISI's Timber Transaction Price Service (Timber TPS) is an online service that gives you objective reports of stumpage prices by species, product, and region, plus powerful tools that let you view and analyze specific timber sales throughout the U.S. Using Timber TPS's online reports and analytical tools, you can more quickly and accurately assess the market value of timber and timberlands, leading to better investment decisions and better outcomes for timber sales or purchases.

Timber TPS relies on the participation of its subscribers to ensure that the highest volume and quality of timber sales is reported. And since transparency is a key to quality, we report data for numerous sale, tract, and product attributes. You may also choose to exclude data and outlying transactions.

The following instructions should help you in using the Timber Transaction Price Service, with steps detailing how to view and input sales data. If you have any additional questions, please view the online help section or contact tps@risiinfo.com. Please read this information guide thoroughly before using the service. It will answer many of your questions and help you increase your effectiveness when using RISI's Timber Transaction Price Service.

Requirements for use:

- Internet access
- Microsoft Internet Explorer or Mozilla Firefox
- Timber TPS password and login name

Timber TPS is provided by RISI, the leading information provider for the global forest products industry. For more information on RISI solutions, visit www.risiinfo.com.

Please look to the following pages for step-by-step instructions.

1. Login to TTPS

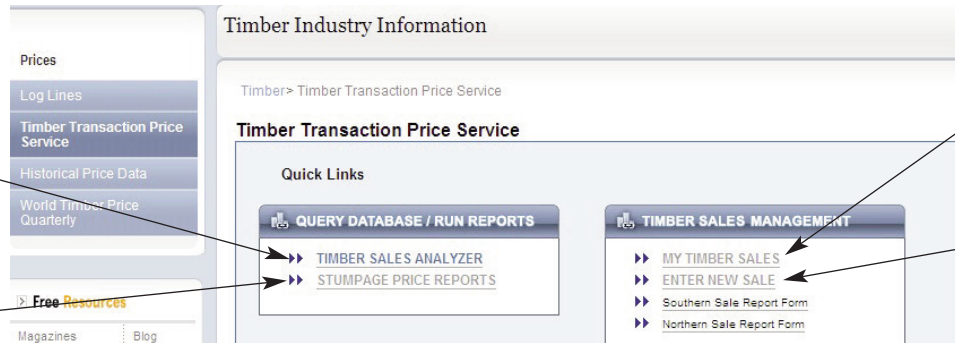

Log in to www.risiinfo.com using your RISI username and password. Navigate to TTPS by selecting the "Timber" Tab at the top of your screen, and then mouse over "Prices" to select "Timber Transaction Price Service".

2. Main Menu & Map

Timber Sales Analyzer – Allows you to query the TTPS database and look at sales in depth.

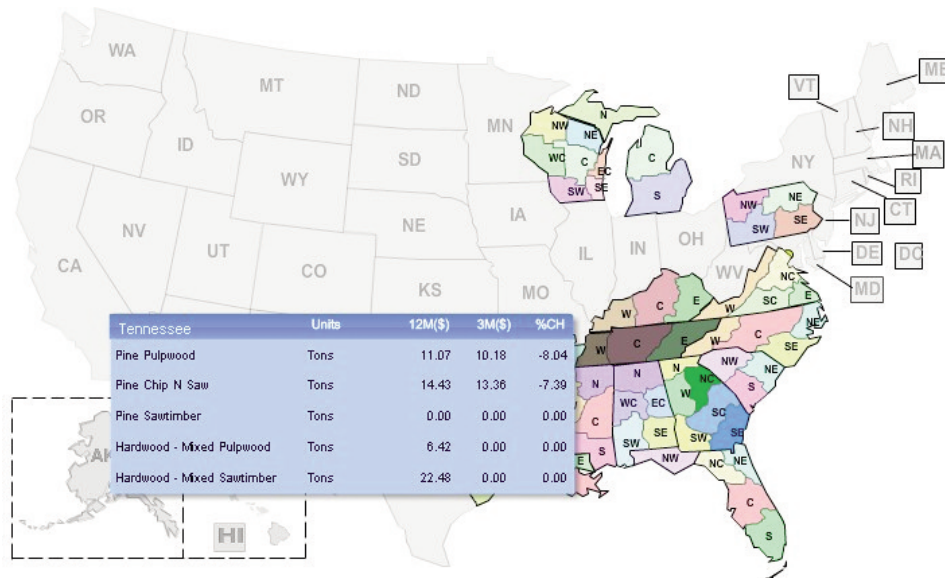

Stumpage Price Reports – Custom content provided for your organization by RISI will be located here.

My Timber Sales – Timber sales submitted by your organization are displayed and accessed here.

Enter New Sale – Enter a new sale here.

Map – Displays states and regions covered by TTPS. States that you have access to will have a pop up displaying the average prices for ALL sales in the database in that state.

3. Timber Sales Analyzer (TSA)

Timber Sales Analyzer (TSA) – The TSA allows you to set criteria for retrieving timber sales from the database. Upon generating the report, all sales meeting such criteria will be returned for additional analysis. Through the TSA, you can create price tables and graphs to track trends and variations in the markets, or view individual sales in detail. You have the option of exporting the data to excel for further analysis.

Queries - Select a saved query from the drop down menu, or continue with a **New Query**.

Price Type - Depending upon your subscription, you may select Stumpage, Delivered or Land Sale.

Select Location –You may search by individual regions and counties, or select ALL regions and counties within selected states.

Select Product Specifications – Search by individual product/species combinations, or select ALL species and products for the given location. (Note: for species with multiple sub-species, ie: Pine – loblolly, slash, etc, the “Pine” selection will search all subspecies as well.

Sale Information – Optional selections, we suggest that these be left blank for maximum results (except for the Indicative of Market field).

Query Definition – allows you to name and save queries for future use.

Access Level - Depending upon your subscription, you may have access to **Transaction Detail** or **Regional Detail**. Transaction Detail allows you to search by county and view individual sale details. Regional Detail draws upon a slightly larger dataset, but sale details are not available.

Indicative of market – allows you to exclude sales deemed as not indicative of normal market conditions by RISI or the submitting company (i.e.: damaged timber from salvage sales).

My sales only – allows you to search only within your organization's timber sales.

Generate Report – click here to retrieve sales.
