

Overview

Below are the List of Tables and a sample table from the *European Graphic Paper Annual Historical Data*.

An invaluable reference tool, the Annual Historical Data contains over 1,600 series of historical data researched and developed by RISI. The sources include government, association and RISI estimates. The data are cross-checked, revised, up-to-date and are presented in units of measurement that are comparable across grades and regions.

Included are 17 years of annual historical data for graphic papers demand, supply and prices in each country. The data is individually modeled and then the supply, demand and trade are aggregated for the regions as a whole.

Five grades are covered: newsprint, uncoated mechanical, coated mechanical, uncoated woodfree and coated woodfree.

For additional information, please e-mail us at sales@risi.com.
