

Overview

Below are the List of Tables and an excerpt from the *European Paper Packaging Annual Historical Data*.

An invaluable reference tool, the *Annual Historical Data* contains over 2,000 series of historical data researched and developed by RISI. The sources include government, association and RISI estimates. The data are cross-checked, revised and up-to-date, and are presented in units of measurement that are comparable across grades and regions.

Included are 17 years of annual historical data for containerboard, corrugated boxes and cartonboard. The *Annual Historical Data* contains 65 tables, broken down into major product groups. Concepts include imports, apparent consumption, exports, shipments, capacity, operating rates, prices and costs.

RISI is expanding its analytical and forecasting coverage for containerboard and cartonboard to the eastern parts of Europe. The *European Paper Packaging Annual Historical Data* report now includes a detailed demand/supply balance for each of the following regions: Western Europe, Central Europe, Eastern Europe and Southeastern Europe, and for each producing country within each of these regions. Each table covers the period from 1992 to 2008. Concepts covered in these tables include apparent consumption, trade, production, capacity, prices, costs and operating rates. The demand, supply and trade data cover all of the major containerboard grades (kraftliner, recycled linerboard, semichemical corrugating medium and recycled corrugating medium) as well as all the major cartonboard grades (folding boxboard, liquid packaging board, solid bleached sulphate board and white lined chipboard).

For additional information, please email us at info@risi.com.
