

## Overview

Below are the Table of Contents (List of Tables) and a sample table from the *North American Lumber Annual Historical Data*.

An invaluable reference tool, the *Annual Historical Data* contains over 2,500 series of historical data researched and developed by RISI. The sources include government, association and RISI estimates. The data are cross-checked, revised and up-to-date and are presented in both square feet and cubic meters.

Included are 17 years of annual historical data for North American softwood lumber demand, supply, end use, prices and costs.
