

Overview

Below are the Table of Contents (List of Tables) and a sample table from the *North American Timber Annual Historical Data*.

An invaluable reference tool, the Annual Historical Data contains over 1,000 series of historical data researched and developed by RISI. The sources include government, association and RISI estimates. The data are cross-checked, revised and up-to-date, and are presented in units of measure that are comparable across products and regions.

Included are 17 years of annual historical data for timber markets in the major US producing regions. Topics include demand for solid wood products, paper, paperboard, pulp, growth, harvest, inventories, regional impact of environmental regulation and prices.
