

Overview

Below are the List of Tables and a sample table from the *North American Wood Panels Annual Historical Data*.

An invaluable reference tool, the *Annual Historical Data* contains over 2,500 series of historical data researched and developed by RISI. The sources include government, association and RISI estimates. The data are cross-checked, revised and up-to-date, and are presented in both square feet and cubic meters.

Included are 17 years of annual historical data for North American softwood lumber, plywood, oriented strandboard (OSB), particleboard, medium density fiberboard (MDF) and hardboard demand, supply, capacity prices and costs.
