

Overview

Below are the Table of Contents and a sample table from the *North American Wood Panels and Engineered Wood Products Capacity Report*.

The *North American Wood Panels and Engineered Wood Products Capacity Report* provides RISI's latest information on individual mill capacities from 1999 through 2011. The report includes softwood plywood, OSB, particleboard, MDF, engineered lumber (wood I-Joist and LVL) and hardboard mills in both the United States and Canada. Capacity data are organized by product, by country and by state/province.

Table of Contents

Introduction

Top North American Producers in 2009

North American OSB

Capacity Summary
Capacity by Mill
Capacity by Region and State/Province

North American Softwood Plywood

Capacity Summary
Capacity by Mill
Capacity by Region and State/Province

North American Particleboard

Capacity Summary
Capacity by Mill
Capacity by Region and State/Province

North American MDF

Capacity Summary
Capacity by Mill
Capacity by Region and State/Province

North American Hardboard

Capacity Summary
Capacity by Mill
Capacity by Region and State/Province

North American Engineered Wood Products

Capacity Summary
LVL Capacity by Mill
Wood I-Joist Capacity by Mill

Excerpt - Introduction

This publication updates RISI's estimates of individual panel mill capacities through 2008 and provides a forecast through 2009 with information collected as of May 2009. Included are data for both the United States and Canada for:

- Oriented Strandboard (OSB)
- Softwood Plywood
- Particleboard
- Medium Density Fiberboard (MDF)
- Hardboard
- Laminated Veneer Lumber (LVL)
- Wood I-Joists (Solid Wood and LVL Flange)

Data for each product are arranged in the following order:

- Chart Illustrating Major North American Producers
- Summary by Region
- Alphabetical Listing by Company
- Listing by State/Province

In contrast to previous years, we have not included additional estimates of aggregate capacity closures/expansions beyond those listed for specific mills through the forecast. As a result, the 2008-2011 volumes listed in this report will not necessarily match those contained in our product forecasts, which include assumptions on regional capacity that will not return to full production once markets rebound, capacity that will close as a result of current and near term market conditions, and any unannounced capacity expansions/creep anticipated through 2011.
